Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. Applicant's election without traverse of figures 5C-6E, claims 1-6 and 8-57 in the reply filed on 08/18/2004 is acknowledged.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 28 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The phrase "wherein the and" is unclear as to which part is being referred to.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Art Unit: 3731

5. Claims 1-3, 9-11, 20-31, 35, and 36 are rejected under 35 U.S.C. 102(e) as being anticipated by Wilson et al. (U.S. 6,264,682).

Note in figures 27A-29A, an elongate tubular member (90) having first opening at the distal end of the tubular member (90) and second opening proximal to the distal end of the tubular member (90), wherein a guide wire (99) adapted to pass through said first and second openings; and furthermore, wherein a support wire (96) adapted to pass through third opening and also adapted to receive an endoluminal medical device (note medical device is not being claimed).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3731

7. Claims 4-6, 8, 12-19, 32-34, and 37-57 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wilson et al. (U.S. 6,64,682) in view of Tsugita (U.S. 6,168,579).

Wilson et al discloses the claimed invention as state above except for an expandable filter mounted on the distal end of the support wire (96). However, Tsugita teaches that it is know in the surgical art to have an expandable filter (20) mounted on the support wire (10).

It would have been an obvious to one of ordinary skill in the art at the time the invention was made to provide the support wire (96) with an expandable filter mounted on the distal end of Willson et al device as taught by Tsugita in order to entrap and remove embolic material such plaque from the vessel.
